

Head Start Kit

Around the country, public and private non-profit agencies promote Head Start programs for the young children in their care. These programs provide comprehensive child development services to economically disadvantaged children and families, with a special focus on helping preschoolers develop the early reading and math skills they need to be successful in school.

With these programs in mind, Kits for Kidz™ has developed an assembled Head Start Kit that will give preschoolers some basic tools they can use to develop these needed skills. Each kit comes packaged inside a sturdy 16" backpack. All backpacks have adjustable straps, multiple pockets and a padded handle. The backpack assortment includes an equal amount of boys & girls styles to ensure a successful distribution.

All components included were chosen with the Head Start mission of cognitive development in mind. The kits are stocked and can ship immediately to your choice of destination, ready for distribution. A sample kit is available upon request
